

RAHUL SHENOY R

Udupi, Karnataka | rahulshenoy1999@gmail.com | +91 9739425022

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in data management, data validation, and large-scale dataset analysis using SQL, Python, and Excel. Skilled in working with structured and unstructured data, ensuring data accuracy, and optimising data workflows. Experienced in exploratory data analysis, data quality checks, and process automation. Strong interest in financial markets and research-driven data analysis, with exposure to AI-assisted data workflows.

TECHNICAL SKILLS

Data & Querying: SQL (PostgreSQL), Data Extraction, Data Transformation

Programming: Python (Pandas, NumPy)

Data Quality & Processing: Data Cleaning, Data Validation, Data Integrity, EDA

Visualisation: Power BI (DAX), Tableau

Tools & Platforms: Excel, Git, Jupyter Notebook

Other: AI-assisted analysis, Prompt Engineering

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions - Associate

Oct 2021 – Jul 2024 | Bangalore & Mangalore, India

- Analysed and processed large-scale structured datasets (100K+ records) using SQL, supporting data-driven decision-making
- Designed and optimised 100+ SQL queries, improving query performance by 20–30% and enhancing reporting efficiency
- Performed data validation, data cleaning, and quality checks, ensuring >95% data accuracy and consistency
- Managed relational databases (PostgreSQL), improving data accessibility, integrity, and storage structure
- Automated data processing workflows, reducing manual effort by ~25% and improving turnaround time
- Collaborated with cross-functional teams to translate business requirements into structured data solutions

PROJECTS

Master's Thesis - Context-Based Machine Learning for Cricket Performance Analysis

- Built an end-to-end data pipeline processing 100K+ records, enabling scalable data analysis
- Performed data transformation and feature engineering using Python and SQL on structured datasets
- Improved dataset structure and query performance by ~30%, enabling faster data retrieval
- Developed automated workflows to convert raw data into analysis-ready datasets
- Conducted exploratory analysis to derive performance insights from complex datasets

COVID-19 India Data Analysis Dashboard – Power BI

- Collected and integrated publicly available datasets, ensuring data accuracy and consistency across multiple sources
- Performed data cleaning, transformation, and validation using Power Query, improving dataset reliability
- Built an interactive Power BI dashboard (10K+ records) with data modelling and DAX measures to analyse trends and key metrics
- Implemented data quality checks and automated refresh workflows, improving reporting efficiency and reducing manual effort

EDUCATION

MSc in Data Science

University of Europe for Applied Sciences, Germany | Sept 2024 – Feb 2026

Relevant Coursework: Data Analytics, Data Engineering, Data Visualization, Machine Learning, Cloud Computing

BTech in Industrial and Production Engineering

Manipal Institute of Technology, India | July 2017 – July 2021

Relevant Coursework: Data Analytics and Visualization, Operations Research, Quality Engineering
